Simfer believes that the **heart of any **home** is its **kitchen**.**

Starting here, our cookers, heaters, fridges and all other products help you give warmth to your entire home.

Create a warm atmosphere

simfer

Inspiring

Your values are meant to inspire the ground rules that define your behaviour. They are what you believe in and what you defend every day.

We inspire our people to always think one step ahead of our competition. That's why we create reliable and beautifully designed enclosures. We question everything we do to constantly improve.

Simfer is a family who works for every other family in Turkey. Our growth as a company is possible thanks to the family stores that distribute our products and the family homes that use them. We listen carefully to them to innovate and meet family needs.

Make Your House a Home

Simfer is the common point of every kitchen, it is at the centre of every home: Simfer is "The Warm Geart of Your Home".

By adding life, delicious food and comfort to your house, you make it a home. With Simfer, you give your home its warm heart.

A real interest in people and bringing them a flavour or Turkish warmth. We understand the difference true warmth can make in our lives. We want to bring to life in our communications the famous Turkish friendliness and family home culture.

A reassuring, **friendly** warmth — making every Simfer **product** a true **family** member. Supported by the quality, design and brand range that others can't deliver. By focusing on you, our customer and understanding your needs and wishes, Simfer **creates** products that can inspire you to make **home** cooking and living a richer, **warmer** experience.

Family Focused

simfer

We support green life...

We do care about the future and have respect for the nature.

Energy Efficiency A: Save energy and money by choosing an A energy-efficient cooker.

We care about safety...

We are family focused and all of the family members are protected.

Oven Safety Lock: It locks display functions, preventing accidental activation or modification of the settings.

We are practical...

Easy to Clean: The inner walls of the oven feature special enamel plates. The enameling is interspersed with so-called catalytic particles which cause predominantly fat deposits to be distributed over the enamel at temperatures starting from 180°C.

Low-e Glass: Low-emissivity glass (or low-e glass as it is commonly referred to) is a type of energy-efficient glass designed to prevent heat escaping through your windows to the cold outdoors.

Flame Failure Safety Device: For added peace of mind, the flame failure safety device shuts down the gas if the flame becomes accidentally extinguished while cooking.

Induction Child Lock: The child safety lock safely prevents unintentional switch-on.

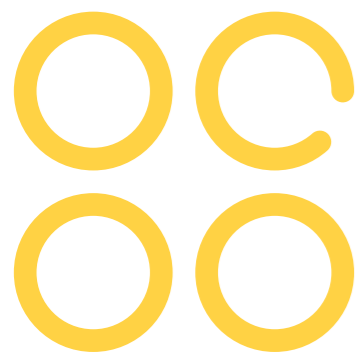

Steam Cleaning: By this technology, you can easily clean your oven cavity. Put the water into the tray and place your tray at the bottom level of your oven and set the operation knob. After the process, simply wipe away the residues using a soft cloth.

Easy to Remove Full Glass Oven Door: Full glass inner door making your cooker easy to clean with a single wipe.

Offers the easiest way of cleaning the inside of the oven.

Steam cleaning

After removing (all) the accessories from the oven simply put water into the tray and place your tray at the bottom level of your oven and set the operation knob.

High and low grill

High grill is used for grilling large numbers of items since it covers the whole surface of the grill. Low grill provides the same cooking results for smaller quantities, while being energy efficient.

Induction productivity table

Induction cooktops work on a different principle despite the traditional cooking methods.

The cooktop produces the electromagnetic vibrations, which induce the pot or pan to generate its own heat, resulting in quickly heating the pan and its content only. This way the hob remains relatively cool.

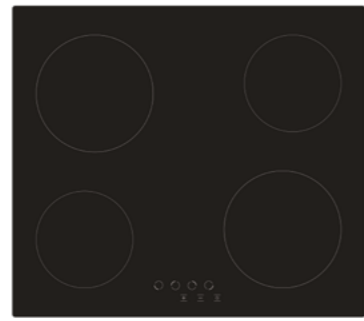

With the Induction technology only **10%** of the energy used is lost to the surrounding.
